

REVTECS PROTECTION - WINDSHIELD

Use Revtecs Protection – Windshield for the windshield of your car. It will become more resistant to gravels projections and scratches. Insects wont glue on it. Water will drain right off. Ice, snow, frost will be easy to wipe off. Drive with the best possible vision in any climatic conditions.

Invisible

**100 % no
air bubbles**

**Easy
cleaning**

**Splashes
Protection**

**Anti-bacteria
effects**

**More
resistant**

LONGEVITY

Revtecs Protection – Windshield may last over one year. Of course this depends on your personal millage.

The wipers may wipe the windshield more than 100 000 times before a new treatment may be needed.

In cold, snowy, harsh climates, we recommend to treat the windshield once before and then after the winter.

REVTECS PROTECTION – MANUEL

The application of Revtecs Protection – Display goes in 3 steps

Etape 1

Clean: Clean thoroughly the surface to be treated with the pocket #1 (pocket 1. Cleaner). (dirt, dust, insects residue, grease, calcium, etc.)

Etape 2

Treat: Revtecs Protection. (pocket 2 Protector) It includes 2 tissues. Use the first one on ½ of the windshield, and the second one for the other 1/2.

Etape 3

Drying time:
After about 10 minutes from applying the protector, the surface is dry. Polish carefully with the micro fiber cloth for a few minutes.

Notes

We recommend a total drying time of at least 12 hours for Revtecs Windshield offers its full effect. It is therefore recommended to proceed to the application in the evening.

According to your climate, we recommend that you treat your windshield once before the winter, and once after.

Revtecs Protection – Windshield may be used for any large glass areas such as bay windows, shower glass walls, mirrors...)
